Art Unit: 3737

### Specification

The disclosure is objected to because of the following informalities: On page 1, applicant should update the continuing data. Appropriate correction is required.

#### Claim Objections

Claims 13-16 are objected to because of the following informalities: In claim 13, lines 2-3, "the catheter" lacks antecedent basis. It is only inferentially set forth in the preamble. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Ginsburg. The claims are directly readable on Ginsburg in view of figures 7,8a-c which shows a catheter having a deflector arrangement comprising fins. The fins are capable of functioning as set forth in claim 13.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sohn and Schulte each disclose a catheter having fins.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth S Smith whose telephone number is (703) 308-3063. The examiner can normally be reached on M-F 5:30 AM- 2:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on (703) 308-5181. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
